

Sreenidhi Institute of Science and Technology
Department of Computer Science and Engineering
Summer Industry Internship -1 (9E585)

Roll No	Name	TITLE
23311A05P5	Himanshu Bijja	CODSOFT WEB DEVELOPMENT

ABSTRACT

The CodSoft Web Development Internship provides a hands-on learning experience designed to build strong fundamentals in modern web technologies. Interns work with HTML, CSS, JavaScript, and frameworks to develop responsive and visually appealing websites. The program includes real-time tasks such as creating landing pages, portfolio websites, and functional web applications that reflect industry standards. Through these projects, participants learn page structuring, UI styling, interactive components, and client-side logic implementation. The internship also focuses on problem-solving, clean coding practices, and understanding user-centric design. By the end, interns gain practical development experience and are well-prepared for real-world web development roles. Interns also gain exposure to version control using Git and learn how to deploy websites on popular hosting platforms. The internship encourages creativity and innovation by allowing participants to experiment with modern tools and libraries. By collaborating on tasks and building real-world projects, interns strengthen their technical confidence and professional readiness for the evolving web development industry.
