

Unit-I

25/11/2021

1. Chomsky hierarchy of languages
2. NFA to DFA conversion
3. Construct DFA with constraints & condition mentioned
4. Minimization of DFA / Equivalence of DFA.

Unit-II

1. Construct FA from Regular Expression
2. Derive RE from FA
3. Grammar to CNF
4. Simplification of CFG.
5. Derivation trees

Unit-III

1. Language $\rightarrow$ Turing machine
2. PDA Construction
3. Recursive enumerable languages
4. Transition function PDA

Unit-IV

1. LL parser table
2. Draw a diagram and explain the ^{phases} of compiler
3. Ambiguous grammar to unambiguous
4. Left recursion.
5. Recursive descent.

Unit-V

1. LR(0)
2. SLR(1)
3. CLR(1)
4. LALR(1)

5. Operator precedence parsing

Unit - VI

1. Symbol table Organization
2. Sources of Optimization [Loop peephole
3. DAG.
4. Intermediate Code Generation
