

SET 1

1. Demonstrate the Weka machine learning toolkit and perform the following exercises
 - a. Determine the numbers of instances of each class are present in the Weather data
 - b. Load the Weather dataset and view the Visualize panel.
 - c. Write confusion matrix using naïve-bayes classifier.
2. using the BASKETS1n dataset, select the data as given below. Customer age < 35 and count the customers who buy dairy and VEG products

3. Employee:

Eno, Ename, Sal, Deptno
E01, Rahul, 20000, 10
E02, Faisal, 30000, 20
E03, Kranthi, 28000, 30
E04, Tuni, 25000, 20
E05, Kyle, 29000, 20

Dept:

Deptno, Dname
10, CSE
20, IT
30, AIML

Find details of employee as

Eno, Ename, Sal, Deptno, Dname

SET 2

1. Demonstrate the Weka machine learning toolkit and perform the following exercises
 - a. Determine the numbers of instances of each class are present in the Iris data
 - b. Load the Iris dataset and view the Visualize panel.
 - c. Write confusion matrix using naïve-bayes classifier.
2. Using BASKETS1n dataset select the data as given below. Find the AVG income of customers who buy atleast 5 products

3. Employee:

Eno, Ename, Sal, Deptno
E01, Rahul, 20000, 10
E02, Faisal, 30000, 20
E03, Kranthi, 28000, 30
E04, Tuni, 25000, 20
E05, Kyle, 29000, 20

Find TotalSal, AvgSal of employees in each department

SET 3

1. Demonstrate the Weka machine learning toolkit and perform the following exercises
 - a. Determine the numbers of instances of each class are present in the glass data
 - b. Load the glass dataset and view the Visualize panel.
 - c. Write confusion matrix using naïve-bayes classifier.
2. Using BASKETS1n dataset select the data as given below. Derive the field whose homeown is 'YES' and Age > 30 and sort data w.r.t. income in Ascending order, and output only the item fields.

3. Employee:

Eno, Ename, Sal, Deptno
E01, Rahul, 20000, 10
E02, Faisal, 30000, 20
E03, Kranthi, 28000, 30
E04, Tuni, 25000, 20
E05, Kyle, 29000, 20

Find details of employee after adding 25% increment.

SET 4

1. Demonstrate the Weka machine learning toolkit and perform the following exercises
 - a. Determine the numbers of instances of each class are present in the Labor data
 - b. Load the Labor dataset and view the Visualize panel.
 - c. Write confusion matrix using naïve-bayes classifier.
2. Using BASKETS1n dataset select the data as given below. Find the mean value of salary w.r.t age={Young, Middle, Senior}.

3. Employee:

Eno,Ename,Sal,Deptno
E01,Rahul,20000,10
E02,Fizal,30000,20
E03,Kranthi,28000,30
E04,Tuni,25000,20
E05,Kyle,29000,20

Find details of employee getting salary above 25000

SET 5

1. Demonstrate the Weka machine learning toolkit and perform the following exercises
 - a. Determine the numbers of instances of each class are present in the Vote data
 - b. Load the Vote dataset and view the Visualize panel.
 - c. Write confusion matrix using naïve-bayes classifier.
2. Using DRUG3n and DRUG4n datasets select the data as given below. Select 50% of records where maximum type of drug are present along with no restrictions on remaining drugs, and use histogram graph of age w.r.t BP

3. Employee:

Eno,Ename,Sal,Deptno
E01,Rahul,20000,10
E02,Fizal,30000,20
E03,Kranthi,28000,30
E04,Tuni,25000,20
E05,Kyle,29000,20

Find details of employee getting highest and second highest salary

SET 6

1. Demonstrate the Weka machine learning toolkit and perform the following exercises
 - a. Determine the numbers of instances of each class are present in the Diabetes data
 - b. Load the Diabetes dataset and view the Visualize panel.
 - c. Write confusion matrix using naïve-bayes classifier.
2. Using DRUG3n and DRUG4n datasets select the data as given below. Take the equal number of samples of each drug and calculate the Std. Dev. of age w.r.t drug and compare it with complete data Std. Dev. of age w.r.t drug and give a conclusion statement.

3. Employee:

Eno,Ename,Sal,Deptno
E01,Rahul,20000,10
E02,Fizal,30000,20
E03,Kranthi,28000,30
E04,Tuni,25000,20
E05,Kyle,29000,20

Find details of employee after deducting 10% income-tax

SET 7

1. Demonstrate the Weka machine learning toolkit and perform the following exercises
 - a. Determine the numbers of instances of each class are present in the Contact-lenses data
 - b. Load the Contact-lenses dataset and view the Visualize panel.
 - c. Write confusion matrix using naïve-bayes classifier.
2. Using DRUG3n and DRUG4n datasets select the data as given below. List 5 strong associations of attribute values, and derive and display the data.

3. Employee:

Eno, Ename, Sal, Deptno, Job
E01, Rahul, 2000, 10, Sales
E02, Fizal, 3000, 20, Marketing
E03, Kranthi, 2500, 30, Sales
E04, Tuni, 2500, 20, Advertising
E05, Kyle, 2500, 20, Marketing

Transform the above data as shown in target tables

Sales:

Eno, Ename, NewSal, Deptno

Marketing:

Eno, Ename, NewSal, Deptno

Advertising

Eno, Ename, NewSal, Deptno

SET 8

1. Demonstrate the Weka machine learning toolkit and perform the following exercises
 - a. Determine the numbers of instances of each class are present in the Hypothyroid data
 - b. Load the Hypothyroid dataset and view the Visualize panel.
 - c. Write confusion matrix using naïve-bayes classifier.
2. Using DRUG3n and DRUG4n datasets select the data as given below. Append DRUG2n dataset to given datasets and consider distinct values of Age.

3. Employee:

Eno, Ename, Sal, Deptno
E01, Rahul, 20000, 10
E02, Fizal, 30000, 20
E03, Kranthi, 28000, 30
E04, Tuni, 25000, 20
E05, Kyle, 29000, 20

Find details of employee getting lowest and second lowest salary

SET 9

1. Demonstrate the Weka machine learning toolkit and perform the following exercises
 - a. Determine the numbers of instances of each class are present in the Supermarket data
 - b. Load the Supermarket dataset and view the Visualize panel.
 - c. Write confusion matrix using naïve-bayes classifier.
2. Using DRUG3n and DRUG4n datasets select the data as given below. Using the above 3 datasets (DRUG2n, DRUG3n, DRUG4n) perform the following
 - i) Young_Age ≤ 30 , Middle_Age > 30 and ≤ 50 , Senior_Age > 50
 - ii) Multi plot the above Age categories with Na and K and drug

3. Employee:

Eno, Ename, Sal, Deptno
E01, Rahul, 20000, 10
E02, Fizal, 30000, 20
E03, Kranthi, 28000, 30
E04, Tuni, 25000, 20
E05, Kyle, 29000, 20

Find details of employee getting salary between 25000 and 29000
